

PROFILE

Cloud & Systems Engineer and Canadian citizen with 5+ years building secure cloud, infrastructure, and AI systems, including infrastructure as code, Kubernetes, identity & access management, and production AI/RAG pipelines. Delivered enterprise cloud architectures and MLOps pipelines at Qatar's leading Microsoft Platinum Partner.

TECHNICAL SKILLS

Cloud: Microsoft Azure (primary), AWS

AI / MLOps: RAG pipelines, LLM deployment, LangChain, Ollama, vector search, prompt engineering, Gradio, Azure ML

Infrastructure as Code: Terraform, ARM templates, Ansible

Containers & Orchestration: Docker, Docker Compose, Kubernetes (AKS), Helm

CI/CD: Azure DevOps, GitHub Actions, Jenkins

Security & IAM: SSO / SAML, Microsoft Entra ID, Azure Key Vault, RBAC, Conditional Access, Authelia, LLDAP, UFW, Fail2ban

Linux & Self-Hosting: Linux, Caddy, Cloudflare, Tailscale, Nextcloud, automated backups

Monitoring: Azure Monitor, Application Insights, alerting, anomaly detection

Databases: SQLite, ChromaDB, Qdrant, knowledge graphs

Web / Frontend: React, Vite, Tailwind CSS, JavaScript

Languages: Python (Flask, Pandas, scikit-learn), PowerShell, Bash, HCL, SQL

PROFESSIONAL EXPERIENCE

Cloud & Infrastructure Engineer

ZIACO Industries Limited

Nov 2024 – Present

Remote

- Architected and deployed a 13-service containerized private cloud on a dedicated Linux server (ERP, custom Flask finance apps, video conferencing, SSO via Caddy + Authelia + LLDAP, automated backups with Telegram alerting), hardened with UFW/Fail2ban across a 3-country encrypted mesh network.
- Implemented network segmentation, encrypted tunnels, identity & access management, and automated intrusion detection across all services as the sole infrastructure engineer.
- Built a custom Flask application integrated with an ERP API for daily ledger entries, receipt capture, and multi-currency reconciliation, replacing commercial SaaS with a self-hosted alternative.
- Developing an AI monitoring pipeline integrating computer vision, IoT sensor feeds, and operational data to automate risk detection across inventory, procurement, and compliance.

Cloud Engineer

Mannai Microsoft Solutions

Jun 2023 – Sep 2024

Doha, Qatar

- Architected the migration of 15+ .NET enterprise applications to Azure App Service and AKS, with production/staging/test environments and CI/CD via Azure DevOps and Terraform.
- Built IaC-driven CI/CD pipelines that accelerated software delivery by **56%**.
- Designed government-compliant cloud architectures, automating security controls, RBAC, and secret management via Azure Key Vault to achieve audit compliance.
- Engineered an end-to-end MLOps pipeline for LLM development using Python, ChromaDB, and LangChain with RAG, automating data ingestion and deployment for enterprise clients.
- Established cloud governance and end-to-end network architecture standards for multi-cloud environments.

Tech Supervisor & Professor's Assistant

Global Studies Institute (USC / Arkansas State)

Sep 2021 – Jun 2023

Doha, Qatar

- Managed accounts, access, and security policies across Active Directory and Azure AD for 200+ students and faculty.
- Reduced classroom and lab system downtime by **85%** through proactive monitoring and rapid fault resolution.
- Managed locally hosted Windows/Linux servers plus Azure cloud services.

Cloud DevOps Intern
Snoonu Co.

Apr 2022 – Jul 2022
Doha, Qatar

- Configured Jenkins CI/CD pipelines with automated QA via Cypress and built SQL-based service-health dashboards.
- Deployed multi-container applications on AKS using Helm across dev, staging, and production.
- Improved Git practices, reducing merge conflicts by **30%**, and mentored teammates on DevOps workflows.

Sales & Operations
Alif Stores / Alamat Trading

Jan 2020 – Sep 2021
Doha, Qatar

- Built a barcode-scanner-integrated inventory system using Microsoft PowerApps, reducing stock-count time by **53%** and enabling real-time tracking.

SELECTED PROJECTS

Open-source — full code at github.com/siddiqitaha

Local RAG Document Assistant — Offline document Q&A over your own files: a local LLM (Ollama) with embeddings and a ChromaDB vector store. Answers are grounded in the source with citations and nothing leaves the machine — a private alternative to API-based RAG. *Python, LangChain, ChromaDB, Gradio.*

Azure Terraform Platform — Reusable Terraform modules that stand up a full AKS platform (VNet, AKS, ACR, Key Vault, Log Analytics) from a single apply, with dev/prod separation, remote state, least-privilege roles, and a CI pipeline running fmt/validate/plan. *Terraform, Azure, GitHub Actions.*

Self-Hosted Private Cloud — A secure multi-service stack behind one reverse proxy with SSO/2FA, default-deny access control, internal-only networking, and automated volume backups with alerting — the security backbone of a SaaS replacement. *Docker Compose, Caddy, Authelia, LLDAP.*

RunbookForge — Captures a messy build, distills the golden path, replays it on a clean environment to prove reproducibility, then publishes a searchable docs site and PDF. *Python (plugin core), MkDocs, CLI.*

Hermes — Knowledge Brain — A model-agnostic memory substrate that gives AI agents persistent recall: a knowledge graph with recall / remember / reason operations that survive restarts and model swaps. *Python, SQLite.*

EDUCATION

University of Aberdeen
BSc Business Management & Information Systems

Doha, Qatar
Sep 2020 – Jun 2024

- **Campus Committee Chairman:** led a 19-member committee, organized career fairs, co-authored student bylaws (Leadership Academy, 2021).

Elev8 Future Digital Leaders — Microsoft Qatar
Cloud Solution Architecture Program

Doha, Qatar
2022

CERTIFICATIONS

AZ-303: Microsoft Azure Architect Technologies — Microsoft (Feb 2021)

KCNA: Kubernetes and Cloud Native Associate — Linux Foundation (Oct 2023, expires Oct 2026)

AZ-900: Microsoft Azure Fundamentals — Microsoft (Aug 2020)

Samsung Innovation Campus — Artificial Intelligence & Machine Learning — Samsung (2022)

LEADERSHIP & VOLUNTEERING

Various Organizations | Doha, Qatar | 2019–2023

- **FIFA World Cup 2022** (Coca-Cola Fanzone) — Staff Manager: led 25+ staff across multiple venues.
- **Qatar Red Crescent Covid-19 Response** — Emergency Response Coordinator: supervised 15 volunteers supporting 9,000 patients.
